PROJECTS

Omnicare Auditing Databases

Databases utilizing existing data workflows streamline and automate 90% of pre-audit data collection to increase efficiency and analysis of on-site audits.

Coder Camps Project : Scraps & Sundries

Inventory management application that depicts a catalog of current inventory, tracks on hand quantities, and displays projections based on current inventory.

Technologies: HTML5, CSS, Typescript/Javascript, AngularJS, ASP.NET, C#

WORK EXPERIENCE

Omnicare Business Analyst

August 2014 - Present

Optimized business processes for new hire training, pre-audit reports, and on-site audit data analysis.

Reduced time spent on data collection and shifted focus to analysis. Protected approximately 1.5 million dollars in high dollar claims for Q1 and Q2 of 2016. Solved issues of data presentation and usable metrics for audit results.

Kroger Pharmacy Technician

July 2009 - October 2014

Filled prescriptions accurately with strong attention to detail, completed retail transactions with patients, translated for deaf and non English speaking patients, and resolved insurance complications quickly.

Microbiology for Health Professions ATA

Spring 2014

Instructed students to correctly perform aseptic technique and helped them problem solve failed experiments.
